

24-core optical cable regardless of the number of cores

Overview

1 and RDSO/SPN/TC/110/2020 Rev. 0 standards, it features 24 single-mode fibers, corrugated steel armor, and UV-resistant HDPE sheath. Designed for underground ducting and direct burial, it ensures long-distance data transmission with minimal loss. The number of optical cores in an optical fiber is the total number of equipment interfaces multiplied by 2, plus 10% to 20% of the spare quantity, and if the communication mode of the equipment has serial communication and equipment multiplexing, you can reduce the number of cores. With proper adjustments to the cable's diameter, weight, mechanical strength, and ability to withstand short. 24 Cores GYTA53 fiber optic cable Double Armored & Double PE Sheathed is the steel tape armored outdoor fiber optic cable and gel-filled PBT loose tubes, and wrapped around a phosphatized steel wire central strength member used for direct buried. Quality of the product is tested according to IEC Standards. Excellent crush and tensile resistance. Available in Single mode or Multi mode according.
