

# 96-core optical fiber chromatogram

## Overview

96 cores are generally sorted in two ways: one is 12 tubes, each with 8 cores: the colors are blue, orange, green, brown, gray, white, red and black. By adopting the TIA/EIA-598C standard, you gain a universal “language” of colors that speeds identification, reduces miswiring, and enhances safety. What color are the 4-core, 12-core, 48-core, 96-core and 144-core optical fiber cables sorted by?

Many times, friends have left messages asking how the colors of optical fiber splices are sorted. This is still quite a lot in practical application. So today we will not talk about the principle, but. elements Water Swellable Yarns are added to nstr rsion I Fibre Color Blue, Orange, Green, Brown, Slate, White, Red, Black, Ye low, Violet, Pink, ELEPHONE SYMBOL MONTH & YEAR OF MANUFACTU elements Water Swellable Yarns are added to nstr rsion I Fibre Color Blue, Orange, Green, Brown, Sl te. \*\*”G. \*\* Can according to customer print requirment. 4 The both cable ends are sealed with heat shrinkable end caps to prevent water ingress. We all know that in the fiber optic cable, more cores are used to distinguish the difference between different cables with color, today we will introduce in detail all the colors in the fiber.
