

Applications of Taiwan Aluminum Alloy Cable Management Frames

Overview

Abstract Due to its infinite recyclability, significant energy-saving and carbon-reduction benefits, and pivotal role in Green Building and ESG (Environmental, Social, and Governance) trends, aluminum alloy has become the preferred material for modern cable management systems, such as . Abstract Due to its infinite recyclability, significant energy-saving and carbon-reduction benefits, and pivotal role in Green Building and ESG (Environmental, Social, and Governance) trends, aluminum alloy has become the preferred material for modern cable management systems, such as . An aluminum cable ladder is an open-frame cable management system made from high-strength aluminum alloy. It consists of two side rails connected by evenly spaced rungs, designed to support and route power and communication cables. Our products enhance organization and aesthetics, making them ideal for various environments. With our own factory and professional service team, we ensure high-quality. Ye Fong Aluminum Industrial Ltd. is the aluminum alloy manufacturer/mill in TAIWAN. Ye Fong has established indirect/direct extrusion pressers, and integrated with straightening, cold drawing lines and heat treating processes by ourselves. We provides worldwide customers with full customized. The new all-aluminum alloy conductors gradually replace the steel core conductors and develop rapidly and are widely used around the world in aerospace, construction, automobile, and civil industries.
