

CIF Price of New Modular Energy Storage Units Exported from Japan

Overview

This report analyses the cost of lithium-ion battery energy storage systems (BESS) within the APAC utility-scale energy storage segment, providing a 10-year price forecast by both system and component. The global Modular Energy Storage Converter market size was US\$ 538 million in 2025 and is forecast to reach a readjusted size of US\$ 767 million by 2032 with a CAGR of 5.2% during the forecast period 2026-2032. In 2025, the global production of modular energy storage inverters reached 74,226. Energy storage systems (ESS) are devices engineered to capture and store various forms of energy, including chemical, kinetic, gravitational potential, latent heat, radiation, and thermal energy. Subsequently, they can convert this stored energy into electricity for future usage. The competitive landscape and strategic partnerships will be key factors to watch in the coming years. The aim of this report is to provide an overview of the energy storage market in Japan, address market's characteristics, key success factors as well as challenges and opportunities in this sector. 5 million in 2023 and could surge to USD 2. Systems rated between 3 kW and 5 kW currently generate the most revenue, but smaller units under 3 kW are projected to grow faster, reflecting.
