

Can Chilean fiber optic cables access the internet

Overview

Fiber-optic broadband reaches the vast majority of urban homes, mobile 5G is expanding rapidly, and the country maintains a fully open internet with no censorship or restrictions on social media. cl | CNEP creates a georeferenced map that visualizes fixed internet coverage and finds that 21,600 km of optical fiber is still needed to provide high-speed connectivity to all households. The National Commission for Evaluation and Productivity (CNEP) developed the optical fiber. Chile offers some of the fastest and most widely available internet in Latin America, with fibre-to-the-home now the dominant technology and household connectivity reaching 96. Use the controls at the top to play the animation or step through year by year. Movistar: Movistar is another well-known. Today, we're joining Desarrollo País of Chile and Office of Posts and Telecommunications of French Polynesia (OPT) to announce Humboldt, a subsea cable route linking Chile, French Polynesia, and Australia — the first ever to directly connect South America and Asia-Pacific.
