

Croatian Double-row Distribution Box

Overview

The equipped fiber distribution box is a special housing designed for the management, termination and distribution of fiber optic cables and is particularly suitable for smaller deployments with up to 12 fiber optic connections. Könnér & Söhnen® Distribution Boards provide reliable connection for up to 7 groups of devices with a maximum current of 32A. Suitable for indoor and outdoor use. An overlength tray for pigtails and various cable inlets ensure the best. Take care never to look directly into the light of an optical fiber, even if the light source is invisible to the naked eye. When working with fiber optic cables, especially during tests or when working with lasers, protective goggles should always be worn to protect against harmful radiation. It enables installers to connect homes and businesses to reliable high-speed.
