Our telescopic unguyed towers are self-supporting portable communication systems. These highly mobile communication towers are designed for rapid deployment and are perfect for use following a natural disaster or whenever speed and efficiency in establishing communication is required. We manufacture two versions of these towers with multiple models. Open trailer towers allow for easy transport over the highway or in challenging off-road conditions. Aluma trailers feature a fully welded structural steel chassis that undergoes hot-dip galvanization for added corrosion resistance. Trailer body components are either produced using the same material or made from aircraft-grade aluminum. All open tra. Cell-on-Wheels(COW) or trailer towers with shelters are the ultimate portable communication system. Shelters are made from the most advanced materials for lasting durability, regardless of where they are deployed. All these systems feature self-supporting towers that are easy to set up and very user friendly. Aluma trailers with shelters can be pai.
