

Distance between the plug-in box and the distribution box

Overview

Clearance: Electrical panels must be installed in a readily accessible area with a minimum clearance of 30 inches (762 mm) wide, 3 ft (36 inches or 914 mm) deep, and 6.5 feet (\approx 2 meter) high in front of the panel. The panelboard's door (hinged cover) shall be able to be opened to a. Spaces around electrical equipment (width, depth, and height) consist of working space for worker protection [110. NEC Article 408 covers switchboards, switchgear, and Panelboards installation and applications. You can mount a number of gas fueled tankless water heaters outdoors, usually with some weather protection, but you need to keep any gas fueled device like a heater safely distant from a potential source of sparks such as an electric meter and panel. This is necessary because it is not practical to run dozens, or even hundreds, of different electrical lines directly into the main circuit. It also helps by segmenting the power off in a.
