

FTTH server room cold aisle depth 800mm

Overview

Standard enclosure for low to medium density server and networking applications. Compact width to optimize data center space. Includes: Baying hardware, Key (s), Keyed-alike doors and side panels, Leveling feet, Mounting hardware, Pre-installed casters, Side panels. The SRK Data Series Cabinets have the capacity and quality to meet modern IT Data Center requirements for high density computing and networking. These 800 mm wide cabinets are available in several heights and depths. They provide flexible ways to mount servers, patch panels, routers, and other. While either hot aisle or cold aisle containment systems can be installed and are both capable of increasing efficiency and cooling today's high heat data centers, meaningful differences exist in how they function and are implemented. To maintain thermal performance, equipment accessibility, and safety, it's essential to follow key spatial guidelines.
