By the end, you'll be equipped to make clean, low-loss connections in any field scenario. What is a. Fusion splicing is the process of fusing or welding two fibers together usually by an electric arc. Executive Summary: A fiber optic pigtail is one of the most commonly specified yet least understood components in structured cabling. Get the wrong connector type, the wrong polish, or skip proper fusion splicing technique—and you're looking at elevated signal loss, increased back reflection, and a. Termination of fiber optic cable may be done in two main ways: through connector termination or fo cable splicing (more commonly known as fo cable splicing).
