

Germany Data Center Cold Aisle Outdoor Type

Overview

CONTEG's aisle containment solution leverages a modular system that separates cold air from hot exhaust air to create an enclosed cold space. This space prevents the mixing of cold and hot air and eliminates hotspots. ConSysTech GmbH is the right address for you! As a leading provider, we offer you a comprehensive range of first-class enclosures that ensure the efficient operation of your data center infrastructure. Our expertise covers various types of enclosures, including cold aisle enclosures, hot aisle. In the Speedbone Data Center, the racks are not placed freely in the room but grouped into so-called cold aisle islands. The servers draw in this cold air and, after being warmed through. Cold Aisle Containment or CAC is a proven, relatively easy to deploy solution for effectively managing airflow within a data centre.
