

H3V switch prevents DHCP access

Overview

The DHCP-ACK or DHCP-OFFER packets received on the port are discarded to prevent DHCP clients from receiving invalid IP addresses. Our company is migrating from Brocade/RUCKUS switches to Extreme. I managed to get one of our new Extreme switches online and passing traffic with no issue. While waiting for compatible SFP modules to arrive, I had it connected to our Brocade stack with a copper line configured for trunking on the. The DHCP clients can also obtain configuration parameters from a DHCP server on another subnet through a DHCP relay agent. " DHCP supports the following allocation mechanisms: · Static allocation—The network. I still think the issue is with the H3C Switch since the computers connected to the same TP-Link switch as the DHCP Server can get IPs without a problem. Basically the TP-Link produces low-end equipment. more Hello Friends, In this video I will show you H3C Switch Configuration.
