

Homemade Laser Diode Flashlight

Overview

[I Built A DIY Laser Light Show Using Only A DVD Player] Want to build a powerful laser light at home?

In this video, I'll show you how to extract a laser diode from an old DVD player/burner and turn it into a high-powered laser light! [I Built A DIY Laser Light Show Using Only A DVD Player] Want to build a powerful laser light at home?

In this video, I'll show you how to extract a laser diode from an old DVD player/burner and turn it into a high-powered laser light! Want to learn how to build a simple but powerful laser with electronics you already have in your house?

We'll show you how to use parts from a desktop computer with a DVD drive to create a fully-functioning red burning laser. Lay the desktop computer on its side and open the cover. This should be. Why Publish?

Make a Simple Laser Diode Module: Laser diodes are quite useful in some ways especially in trigger/alarm systems such as triplight mechanisms or even in DIY toys if you just want to play with it. Most types are really easy to use too, once you. In this project, we will show how to connect up and build a laser diode circuit.
