

# How are the fireproof cable trays in Mozambique

## Overview

Marine cable trays must do two jobs: fight rust from salt water and stay strong during a fire. Using SS316 stainless steel or special coatings ensures these systems don't melt or break when things get hot. Investing in fire resistant protection in Mozambique means protecting workers, equipment, and the long-term future of your business. For decades, Durocast (Pty) Ltd has been a trusted South African producer of fire resistant and refractory materials, supplying export-ready solutions across Southern. Electrical fires can spread rapidly through the cables within a tray system, which is why choosing the right material for your cable tray is paramount in reducing the risk. Materials like steel, aluminum, and fiber-reinforced plastics all behave differently in the presence of fire, so understanding. FireMaster® products insulate cable trays carrying instrument control cables to ensure that the cables can operate long enough to allow process shut down during fires.
