

How much does an internet data center cost

Overview

Large data centers typically cost \$10 million to \$25 million annually to operate, while mid-sized facilities range from \$200,000 to \$500,000 per year. The first cost any new data center ever incurs is the initial infrastructure and construction costs for physical facility. Data center construction costs can range from \$10 million to over \$100 million, depending on. Data center demand is heightened as AI, cloud storage, and an increasingly digitalized world outpace the available market capacity—and undersupply conditions are a norm in the industry. Most facilities run between \$625 and \$1,135 per square foot, or about \$7 million to \$12 million per megawatt of IT capacity. This investment is primarily driven by critical components such as electrical systems, HVAC, and land prices. Additionally, the average expenditure per megawatt of power.
