Get the Best Prices for CCTV Cameras, Access Control System, Public Addressal, Safety and Intrusion Alarm Systems. An IK10 camera refers to a security or surveillance camera that is rated as IK10 according to the European EN 62262 standard, which relates to the degrees of protection provided by enclosures for electrical equipment against external mechanical impacts. In unattended installations, front assembly failure typically results in device downtime, service dispatch, and replacement cost—so impact targets are best aligned early in the design stage.
