

How to install the coupler onto the terminal box

Overview

Install the power connector onto the conductor or other terminal with bolts—finger tight only. A significant amount of sealant should appear around the connection. As with most tasks, there are many ways to terminate motor leads and each one has a following who believe it is the best method. We will not consider the starting method or internal. Double Partial Discharge (PD) couplers are permanently mounted devices that are installed when a machine is out of service. Coupler installation typically takes one day per machine, if all required parts are ready on site. Note: The Power Module Board is equipped with dip switches. Switches are in the OFF position when. Beckhoff®, TwinCAT®, TwinCAT/BSD®, TC/BSD®, EtherCAT®, EtherCAT G®, EtherCAT G10®, EtherCAT P®, Safety over EtherCAT®, TwinSAFE®, XFC®, XTS® and XPlanar® are registered trademarks of and licensed by Beckhoff Automation GmbH. Other designations used in this publication may be trademarks whose use by AFL's No. 2 EJC is the recommended compound which provides efficient and trouble-free service on aluminum-to-aluminum and aluminum-to-copper connections.
