

Inquiry about 1G aggregation switch

Overview

The Edgecore AGR110 is based on Broadcom's StrataDNX® Qumran MX™ switch silicon capable of line-rate 800 Gbps Layer 2 and Layer 3 switching. The switch can be deployed either as a top-of-rack switch in the data center, or as a carrier access/aggregation switch. 5G, and 10G speeds for flexible customization, ensuring optimal performance, compatibility, and scalability Flexible interface options like copper, fiber, and PoE ensure seamless integration and cost-effective deployment Supports stacking for easier management, improved redundancy. An aggregation switch is a network device that consolidates traffic from multiple access switches, wireless access points, or other edge devices and forwards it to core switches or routers. The NVR is connect via Fibre to the USW as well. So. ?
