

Is the 120km optical module a ZR

Overview

Operating at a wavelength of 1531.12nm, this module supports DWDM (Dense Wavelength Division Multiplexing) technology, enabling efficient use of fiber bandwidth. With a ZR reach of up to 120km, it delivers reliable performance for metro and long-haul network applications. To exceed 120km, traditional solutions rely on EDFA optical amplifiers or dispersion compensation modules. These devices increase capital cost, power consumption, and operational complexity. The SFP+ 10G ZR module changes this model. Using highly integrated optical components, it enables long. When building an efficient and stable network architecture, the 10G SFP+ optical module 120km version stands out with its unique highlights and becomes a powerful assistant in the field of long-distance communication. When designing a high-performance, stable network, the 10G SFP+. Our 10G Base ZR+ 120km Compatible SFP+ transceiver delivers maximum reach with exceptional 28 dB link budget and 2400 ps/nm dispersion tolerance. Cisco offers a range of GBIC, SFP, XFP, SFP+, CXP, CFP, Cisco CPAK, and QSFP+ pluggable. The Integra DWDM 1531.
