

Malawi Three Fiber Optic Communication

Overview

At present, Malawi has a total of six fiber optic network system, connecting major cities and ports to SEACOM and EASSy submarine cable landing system. Among them, the Malawi telecommunications company MTL and Malawi power supply company ESCOM each have three optical. The Optic Fibre Communications (OFC) is a semi-autonomous department within ESCOM that operates a national wide overhead Optic Fibre backbone network strung on electricity infrastructure reaching all parts of the country and the National Data Centre supported by the Malawi Government. The national fibre backbone project will see a dedicated investment of \$23. The National Fiber Backbone Project is one of the projects the Chinese government is financing in the country. The project is going to be financed through a soft loan from China Exim Bank and will be implemented by Huawei Technologies.
