

Optical Module PRB Testing Equipment

Overview

Built with proven laboratory grade technology, it delivers stable, repeatable, and accurate measurements required in photonics R&D, new product introduction, and volume manufacturing. Pinpoint interference with post-processing spectrum management software in the lab. Use this selector tool to quickly identify the best power supply for your aerospace and defense ATE requirements. 3D Interconnect Designer provides a flexible modeling and optimization environment for any advanced. Test and characterize modern optical components, including photonic integrated circuits (PICs) and silicon photonics, with unmatched speed, precision and accuracy. Using them consistently eliminates the #1 cause of network outages – dirty. 3SAE Technologies designs and manufactures a wide range of proof testers for the fiber optic industry for. NorthLab’s ProView is a highly advanced interferometer for precise measurement and inspection of fiber end faces. Discover the cutting-edge test equipment offered by 3SAE Technologies. AMS Technologies carries tools and equipment for fiber optics processing, providing an end-to-end solution for the assembly of fiber connectors that is exactly tailored to your requirements. In our broad portfolio you can find tools for stripping, cleaving and crimping your fibers, various systems.
