

Order of wiring colors in the distribution box

Overview

Wire color: The neutral wire is blue, and the color of the phase wire (A phase is yellow, B phase is green, and C phase is red) should meet the standard. The lighting and socket circuits generally use. The standard electrical wire color code mandated by the National Electrical Code (NEC) is a critical safety system for licensed electricians. They make it easy to identify immediately which wires are live, neutral, or grounded (avoiding costly mistakes and hazardous accidents). This is a general reference, not a substitute for proper testing. If you need more detailed information, continue reading this article. And it's designed to take the guesswork out of electrical work. The National Electrical Code®. - Resources, Tools and Basic Information for Engineering and Design of Technical Applications! Color codes used in power wiring.
