With an increasing demand for high-speed data transmission in Bhutan, “Nima Lotey Fibre Services” was created by Nima Lotey, a highly trained engineer, to offer installation and maintenance services of optical fiber cables to a wide range of home users, as well as small and. An optical module is a typically hot-pluggable optical transceiver used in high-bandwidth data communications applications. Optical modules typically have an electrical interface on the side that connects to the inside of the system and an optical interface on the side that connects to the outside. AKSH OPTIFIBRE LIMITED is a three decade old company which started manufacturing of optical fibre and optical fibre cables (OFC) in 1994. In the year 2000 Aksh acquired Fibre Reinforced Plastic Rods (FRP) business which is a key raw material for Optical Fibre Cables. AKSH went Public in the year. This SFP+ Module is equipped with an LC duplex connector, reaching a link up to 100km over OS2. Digital diagnostics monitoring is available via a 2-wire serial interface specified in SFF-8472. Featuring low power consumption and high speed, this 10G SFP+ transceiver is ideal for data centers, 10G. We specialize in providing innovative technology solutions for all businesses. The optical transceiver is designed for use in 100/155Mbit/s data links.
