

Power Relay Protection Special Committee

Overview

PSRC is a joint committee in a non-lead role for new IEEE 2800. 1, amendment of IEEE Std 2800-2022, and revision of IEEE Std 2800-2022 projects CTF61 Investigate the need to provide guidelines for mitigating or providing protection for sub-synchronous interactions. Treatment of all matters in which the dominant factors are the principles, application, design, construction, testing, and operation of power system protection and control. Protection and control systems include one or more of the following functions: sensing, data acquisition and processing, fault. PSRC Committee meetings typically have around 250 of the world's experts gathered together. We have around 100+ working groups doing interesting projects at any one time so there is always something of interest to contribute your expertise and knowledge to. The PSRC was established over 75 years ago as the repository for the standards and application guides pertaining to protective. Power System Protective Relays: Principles & Practices Protective Relays - Technical Seminar Nov 2016 - Copyright: IEEE 1 Power System Protective Relays: Principles & Practices Presenter: Rasheek Rifaat, P. We bring together technical leaders and. I47 - Review and determine need of revision of IEEE C37. JOINT WITH PSCCC S18 — S18 - IEEE Standard Common Format for Documenting IED Firmware or Software Changes and confirming their transmittal.

Article Content

Power System Protective Relays: Principles & Practices

As the protected components of the electrical systems have changed in size, configuration and their critical roles in the power system supply, some protection aspects need to be revisited (i.e. the use of ...

PSRC System Protection Subcommittee

Prepare a report summarizing existing and new practical applications and challenges to use Artificial Intelligence and Machine Learning technologies for power system protection and control.

Power System Relaying and Control Committee

The Power System Relaying and Control Committee (PSRC) is a global network of experts in power system protection and control, including sensing, data acquisition and processing, fault detection, ...

Power System Relaying and Control Committee (PSRC)

Evaluate and report on special protection schemes, remedial actions schemes, monitoring and control systems and their performance during abnormal power system conditions.

The IEEE PES Power System Relaying Committee What is it?

Evaluate and report on special protection schemes, remedial actions schemes, monitoring and control systems and their performance during abnormal power system conditions.

IEEE PES PSRC Update

PES Power System Relaying and Control (PSRC) Committee is responsible for the development of standards, guides and reports covering different aspects of protection and control of electric power ...

2026 IEEE PES Joint Technical Committee Meeting

D45 - Protection methods used to reduce wildfire risks due to transmission and distribution lines. C52 - Revise standard C37.246 IEEE Guide for Protection System of Transmission-to-Generation ...

We would like to show you a description here but the site won't allow us.

PSRC Knowledge Base

The PES PSRC Organization and Procedure manual describes the purpose, scope, and organization of the Power System Relaying and Control Committee and all its subgroups.

Power System Relaying and Control Committee

We are working on cybersecurity and standards with NERC, PES and IEC. We are addressing grid stability with guides and standards in protection, control and communication.
