

Shut down the AI server

Overview

Google is reportedly pulling the plug on Project Mariner, the experimental AI browser agent it once positioned as the future of how people interact with the web. We're not aware of any issues affecting our systems. Availability metrics are reported at an aggregate level across all tiers, models and error types. The company claims that this new system scans entire in-game scenes simultaneously and has been shutting down around 5,000 servers per day that violate Roblox's Community Standards since its deployment. Unlike conventional moderation tools. OpenAI's latest ChatGPT model ignores basic instructions to turn itself off, and even sabotaging a shutdown mechanism in order to keep itself running, artificial intelligence researchers have warned. The app had invited users to upload their own faces — so was this some kind of elaborate data grab?

According to a new WSJ investigation, the. Google's autonomous web assistant is over, but Gemini is picking up the pieces. Recent tests by independent researchers and a major AI developer have shown that several advanced AI models display signs of self-preservation by sabotaging shutdown commands, blackmailing engineers.
