

Supplier of IK10 Hot Aisle for Brazilian Data Centers

Overview

Altimir Data Center Solutions designs, fabricates, and installs high quality, custom engineered Hot Aisle and Cold Aisle containment systems for data centers worldwide. Cool Shield™ containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing. Acceleration containment systems are customized for the unique data hall environment and are designed to separate cold supply airflow from hot air coming out of equipment exhaust, while maintaining ease of access to critical equipment. Our Rittal's new aisle containment line solves these problems with a modular, standards-based design that integrates easily with existing racks, cabling, HVAC, and safety systems. We've installed hundreds of containment systems throughout the country, often coming up with custom, creative solutions where other containment providers said it couldn't. Custom engineered hot and cold aisle containment solutions that keep your data center running smoothly — and make your build-out be more efficient, too.
