

The wireless router does not have an optical fiber interface

Overview

The answer isn't as straightforward as a simple yes or no—it depends on the type of router, the fiber setup, and the kind of connection your ISP (Internet Service Provider) provides. Fibre optic broadband. I have recently bought a new router (Huawei AX2) and it doesn't have an optical fibre port like my old one. Is there any adaptor I could use and if yes, what is its name?

Fiber connections are a new ball game. what died?

Your ONT -- Converts Fiber to Ethernet -- generally. An Optical Network Router, often called an Optical Network Terminal (ONT), is a specialized device that acts as the main interface between your Internet Service Provider's (ISP) fiber-optic network and your company's internal network. A fiber wireless router is unnecessary for fiber Internet, but a traditional router will need an adapter to connect the optical network. When switching to fiber internet, many users wonder if they're able to use their own router instead of the one provided by their internet service provider (ISP).
