

Tracks in the distribution box

Overview

Busbars are metal strips or bars that distribute electrical power throughout the distribution box. They carry current from the main switch to individual circuit breakers, providing a reliable connection point for all circuits. [Learn more → OneTrack by ETC](#) gives you the flexibility, capability, and reliability necessary to build beautiful track lighting into nearly any installation. [Learn more → Our Connector Strips](#) offer built-in DMX or Walkerflex is a modular in-floor power distribution system featuring standardized cable, connectors and prewired junction boxes that allow for faster on-site deployment of power. The system is designed to be used in raised floor applications and open ceiling concepts. Power is provided to prewired. Showing modern septic system design and discussing how a distribution box functions. Main Distribution Board (MDB) 2.
