

Vanuatu Lighting Distribution Box Model

Overview

XRM lighting distribution box is a lightweight distribution device indispensable for secondary distribution in various industries. With the improvement of electrical component quality and the introduction of higher-performance electrical components, it plays a key role. It sought to address Vanuatu's "energy poverty" by increasing access by rural householders to handheld solar lanterns, thereby reducing household dependency on the use of kerosene for lighting. Copyright © 2026 - Ambor Structures. This report reviews current practice in the Monitoring, Verification and Enforcement (MV&E) activities undertaken as part of the implementation of MEPS for energy efficient appliances in Vanuatu. The review and assessment were conducted based on desk research, stakeholder consultations, and DoE's.
