

What brand of optical fiber cable is used in Cameroon

Overview

Cameroon has long been presented as a hub in terms of telecom infrastructure in the Central African sub-region. The country is connected to five optical fiber submarine cables (SAT3, WACS, ACE, SAIL, and NCSCS). However, Cameroon is making very little use of this equipment to develop its telecoms sector, as well as that of the Central African sub-region. To provide Africa and South America with a faster and more stable Internet connection, Nexans manufactured and successfully tested 6,000 km of submarine fiber optic cables for the South Atlantic Inter Link (SAIL) project connecting Cameroon to Brazil. From 2012 to 2025, the biggest increases were recorded for Nigeria (with a CAGR of X%), while shipments for the. In 2023, Cameroon continued to rely on a select group of countries such as Italy, China, Ukraine, Spain, and Mexico for its fiber optic cable imports. The high Herfindahl-Hirschman Index (HHI) indicates a concentrated market, with limited diversification among suppliers. Despite this, the industry.
