

What does the L in pigtail model number mean

Overview

The Amphenol Class "L" heavy duty connectors are the largest size cylindricals. They are available only in the specific configurations prescribed by MIL-DTL-22992 for either military or industrial applications. Looking at Ron Stadt's excellent book, WINCHESTER SHOTGUNS AND SHOTSHELLS Winchester identified the Model 37 series as "Steelbilt" because "This new Winchester is made with steel in all metal parts. The term, REDLETTER was not something Winchester coined but collectors, who prize them over. Amphenol meets the demands for heavy duty & heavy power connectors with features that are critical to reliable interconnection in rugged environmental conditions. Resistance to the operating environments of. For use with NEMA L21-30 Extensions and Receptacles If your requirement cannot be filled by L21-30 Pigtails, we can custom-design one that does. Our custom design process allows for quick turnaround tool design and can accommodate short as well as long runs. As leaders in the industry, we're taking a giant step forward to help you control expenses. 00 USD!! You can also take advantage of the optional expedited.
