

What is the price of relay protection wiring

Overview

Typical cost range for a single relay is \$2-\$150 depending on type and rating. This guide presents practical price estimates in USD, with low-average-high ranges and real-world factors that affect total cost. Assumptions: region, specs, labor hours. For the protection of stator winding of the. When budgeting for relays, buyers commonly pay for the type, coil voltage, contact rating, and mounting style. REM615 is a member of ABB's Relion® product family and part of its 615 protection and control product series. The 615 series relays are characterized perability between substation automation devices. This. It provides advanced automation and flexibility, asset management data, and easy retrofitting of most electromechanical relays. The 5-inch, 800 × 480 color touchscreen display option allows you to directly set, monitor, and control your system, including up to five two- or three-position disconnect.
