

What is used for binding cables in vertical cable trays

Overview

Wall-mounted brackets are designed for horizontal or vertical installation when cable trays run along structural walls or columns. They provide rigid support with minimal deflection, ideal for narrow corridors, utility rooms, and industrial equipment lines. Binding tape fixing method: Thread the binding tape through the cable and fix it on the inner wall of the bridge. Allows one cable run to branch off from the main run at a 90° angle. What is the component used to hold cables in place on a vertical cable tray basket?

What is the component used to hold cables in place on a vertical cable tray basket?

The part # to hold cables in place is 99-2125-15. We are guided by our commitment to do business right, world's most. Snap Track Cable Tray Can be used as an Equipment Ground Conductor (EGC) Snap Track cable tray is UL Classified, marked with the available minimum cross sectional area and meets all requirements for use as an Equipment Ground Conductor per NEC Article 392.
