

What to do if the wires in the distribution box are black

Overview

Take your black (hot all the time wire) and marrett it onto the white of the opposite cable (that brings hot power down to your switch). On the same cable (the white you just used that goes to your switch) put the black wire onto the light (under the copper looking screw). Why Your Switch Box Only Shows Black Wires • Most switch boxes hide the neutrals. For some stupid reason, I didn't follow my normal protocol when replacing a receptacle recently and the circuit breaker kept tripping on a receptacle that previously worked (I. Black wire carries ungrounded (hot) current from the electrical panel to a load — an outlet, light fixture, appliance, or switch. It is live at 120V to ground whenever. Im trying to install a replacement light and the box has 2 black, 2 white and 2 ground wires, but my fixture only has one of each.
