The L-com FOTM-OPM-AH is a handheld, multi-wavelength power meter. The FOTM-OPM-AH features a single channel design, with the ability to handle higher-powered inputs over seven (7) commonly used wavelengths. Power meters with wave ID can detect two or more wavelengths simultaneously – decreasing test time and reducing user errors when paired with AFL wave ID light sources. The RP 460 will beep and show “2kHz” on the LCD when a 2kHz modulated signal is recognized. Each time the Save button is pressed, the current reading will be saved to internal.
